**PURE DRIVING PLEASURE.  
IN PERFECT SAFETY.**

A good grip, reliable acceleration, controlled driving dynamics – almost no other components bear as much responsibility as the wheels. Both for safe driving and for the vehicle's overall look. Our developers, designers and engineers master the balancing act between form and function on a daily basis. They do this by combining top-quality materials with first-class designs to create flawless functions. They then subject the results to intensive testing and refinement until they meet our Volkswagen standards of quality and safety.

## WE TEST FOR YOUR SAFETY.

We are not satisfied with just offering you top quality. Therefore our inspection procedures are more extensive, stricter and harder than those demanded by law. And our products are simply safer.

### **Strength tests**

The rotating bending test simulates the wheel loads when cornering, whereas the roll-off test checks the wheel under overload conditions and the impact test puts the impact strength of the edge of the wheel to the test.

### **Material and surface tests**

These tests determine the chemical composition, tensile strength and strain properties of the wheel along with the resistance of the wheel's surface to scratching and corrosion.

### **Endurance testing**

The endurance test is carried out using a bi-axial wheel test bay (ZWARP). This test rig simulates the greatest loads which can occur across the lifetime of a wheel.

### **Vehicle tests**

The clearance test, the wheel bolt tightness test and the threshold test serve to test the wheels under tough conditions on the test track.

## VOLKSWAGEN ACCESSORIES. BECAUSE GENUINE QUALITY IS ALWAYS WORTHWHILE.

### **FEM ANALYSIS**

The red areas of the results show where the greatest forces act on the alloy wheels. This analysis serves as the basis for designs and dimensions.

# HUNGER FOR ADVENTURE VS. AMPLE SPACE.

Everyday adventures can await us around every corner and behind every shop shelf. To experience and enjoy them, you have to keep your eyes open and make space. Space for the right equipment, for any treasures you find, large or small, and - not least - for any contingencies. The easiest, best and most reliable way to do so is with Volkswagen Accessories.

**QUALITY IS WHEN  
THINGS SIMPLY FIT.**

## FOR ALL THOSE WHO WANT MORE: EVEN MORE.

More intelligent transport options, for instance. Or more tested safety features. Or simply more of the trusted quality of Volkswagen Genuine Accessories. A trust which is not simply given to the genuine parts but which has to be earned again and again, day after day. Through materials which simply combine better, product designs which simply look better and functions which simply open up additional opportunities. In other words: with the clear desire to make good things better every day. More beautiful, more functional and safer.

## UNCOMPROMISING SATISFACTION.

Harder, stricter, further, more - the Volkswagen test procedures go beyond the legally prescribed standards. In terms of materials, in the laboratory and finally on the test track. Only 100% quality products are given the Volkswagen Genuine name. No compromises.

**Laboratory testing:** Corrosion test in saltwater spray systems, UV resistance, environmental compatibility and many additional laboratory tests examine all the relevant material properties. The climate chamber subjects the products to extreme temperatures ranging from  $-30^{\circ}$  Celsius to  $+90^{\circ}$  Celsius. The components' function must be guaranteed and unimpaired at all times.

**Endurance:** Whether short distances, high-speed or route profiles of varying difficulty - durability under continuous load conditions is tested. The special road endurance test is carried out with a distance of 20,000 km using the maximum permissible load and a variety of different testing profiles.

**Test track:** Test drives with maximum acceleration both forwards and to the sides, for instance by weaving around obstacles, emergency braking or over cobblestones subject the accessories to extremely hard tests over and over again.

# CITY CRASH TEST. BECAUSE SAFER IS BETTER.

Volkswagen's in-house crash tests are carried out at speeds higher than those required by DIN 75302, ISO/PAS 11154 and the "City Crash" test – Because Volkswagen believes that its own "City Crash Plus" at 30 km/h and a 20% overload on the roof is more realistic than the standards set by DIN and ISO. The City Crash test simulates a rear-end collision in the inner city at a moderate speed of approximately 17 km/h. Although carried out by "Stiftung Warentest" and the "ADAC", it is not a legal requirement.

## Volkswagen Genuine Roof bars

Well equipped when on the move – thanks to the Volkswagen Accessories roof bar systems. The basis for this are the perfectly-fitting, City-Crash<sup>1</sup> tested, aerodynamically-shaped aluminium profile roof bars to which, for example, surf board, bicycle, ski and snowboard holders or the practical roof boxes can be attached to the vehicle roof in no time at all. The roof bars are completely pre-assembled and can be fitted without tools. Thanks to the City Crash test, it has been tested to even higher safety levels than ISO standards.

**Art. no. 5C6 071 126**

## Volkswagen Genuine Bicycle holder

The aerodynamic bicycle holder is made of UV-resistant plastic and mounted on the roof bars using chromed steel holders.
